

# 291 | Lisi Osl Trail

distance 2,0 km difficulty average

altitude meters downhill 410 m

starting point: Gaisberglift Bergstation

destination point: Gaisberglift Talstation

best season: MAY, JUN, JUL, AUG, SEP, OCT

Altitude profile

## Description

On a length of about 2 km, it is necessary to overcome a height difference of 403 meters. The route intuitively follows the natural terrain. With its difficulty level of S1 to S2 (easy to medium), the new trail is not only a highlight for real downhill cracks, it is also manageable for singletrack beginners. Comfortable: You start directly at the exit of the Gaisberg lift. Using a special device, the bikes and bikers are taken up the mountain.
